Comments

(Set forth by above question #, if applicable.
Use "Additional Comments" Sheet, if needed)

File #: 95-230616

#1: With microscopic hair comparison, one cannot determine from the notes that the examination was conducted in an appropriate manner.

#2: Documentation is poor. The notes are not dated or initialed and are in pencil instead of ink. Abbreviations are used that are difficult to interpret. The hairs recovered from the Q item are marked as "SFC" or "NSFC".

Presumably, this means "Suitable for Comparison" and "Not Suitable for Comparison", but there is no documentation as to why these some of these hairs are not suitable. The technician does not document the recovery of hair from the Q item.
